Scope: Lessons 1-5. Total: 15 points.

- Part 1: read 5 Chinese items, 1 point each (5 points).
- Part 2: answer 5 questions, 2 points each (10 points).
- The preparation sheet provides 30 reading items and 14 question groups. It does not specify the exact selections, time limit, or detailed marking rubric.

The questions and reading list come from the teacher. Pinyin, translations, answers, drills and study advice below are prepared study aids, not an official answer key. The examples are not claims about your life. Replace all personal facts and blanks before memorizing.

Start here

1. Fill your real nationality, hobbies, abilities, career goal, timetable, transport, clothing colour and prices, exam time and distances.
2. Read all 30 items aloud. Cover the pinyin and repeat any item you cannot read in two seconds.
3. Practise every question group. Listen for the question word and the day, currency, place or subject being asked about.
4. Run the mock test at the end, without reading the answer bank.

Pronunciation and number drills

- Tones: first is high and level; second rises; third is low (often only low in normal speech); fourth falls sharply. Neutral syllables are light and short.
- Keep the final syllables light in 饺子 jiǎozi, 衣服 yīfu, 馒头 mántou, 怎么样 zěnmeyàng (me), and 多少钱 duōshao qián (shao).
- With adjacent third tones, the first commonly sounds like a rising tone: 你好 nǐ hǎo is spoken like ní hǎo. For longer sequences, group the words naturally rather than changing every third tone mechanically.
- 不 is pronounced bú before a fourth tone: 不会 bú huì. 一 changes in connected speech: 一百 yì bǎi; 一万 yí wàn. The answer pinyin shows these common spoken changes.
- 教 is jiāo in 教我们汉语 (teach us Chinese), but jiào in 教学楼 (teaching building).
- 3.5元: 三元五角 sān yuán wǔ jiǎo; conversational 三块五 sān kuài wǔ. 三点五元 sān diǎn wǔ yuán is the literal decimal reading.
- 480元: 四百八十元 sì bǎi bā shí yuán. Say every place value clearly.
- 105: 一百零五 yì bǎi líng wǔ; 1,500: 一千五百 yì qiān wǔ bǎi; 10,000: 一万 yí wàn.
- Say 两节课 liǎng jié kè (two class periods). 二 is used in digit sequences and numbers such as 二十 èr shí.

- 请说慢一点儿。Qǐng shuō màn yìdiǎnr. Please speak a little more slowly.
- 对不起，我没听清楚。Duìbuqǐ, wǒ méi tīng qīngchu. Sorry, I did not hear clearly.

Use these politely when needed. They are practice support, not part of the teacher's published marking rules.

Common mistakes to catch

- Having: 我有课。Not having: 我没有课。Do not say 我不有课。
- Be an engineer: 我想当工程师。Go to the library: 我要去图书馆。
- A choice question needs your choice. A yes/no question can be answered by repeating the verb: 会，我会打篮球。
- Keep yesterday/today/tomorrow consistent between the question and answer. Chinese verbs do not take English-style past-tense endings.
- For distance, keep the two places: 图书馆离宿舍... . For prices, include the currency.

For each reading item, check every syllable and tone. For each answer, check: understood the prompt; supplied the requested information; used a complete sentence; pronounced it clearly. Mark uncertain items and repeat them. Check answers against the matching numbered group, using your own true details.

Revision plan

If you have 90 minutes: 15 minutes reading list; 30 minutes groups 1-7; 25 minutes groups 8-14; 15 minutes mock tests; 5 minutes on your weakest items. Spend most time speaking because Part 2 is worth two-thirds of the points.

If you have 3 days: Day 1: reading list and groups 1-5. Day 2: groups 6-10 and numbers. Day 3: groups 11-14 and three mixed mock tests. Start each day by recalling the previous day's answers without notes.

Before the test: check the real date/time, your timetable, the day's clothing colour, and any exchange-rate/distance figures required by your teacher. Practise answering in a short, natural

sentence rather than memorizing English translations.
